

THE LIFE OF HEALTH MESSAGES: ADAPTATION PROCESSES

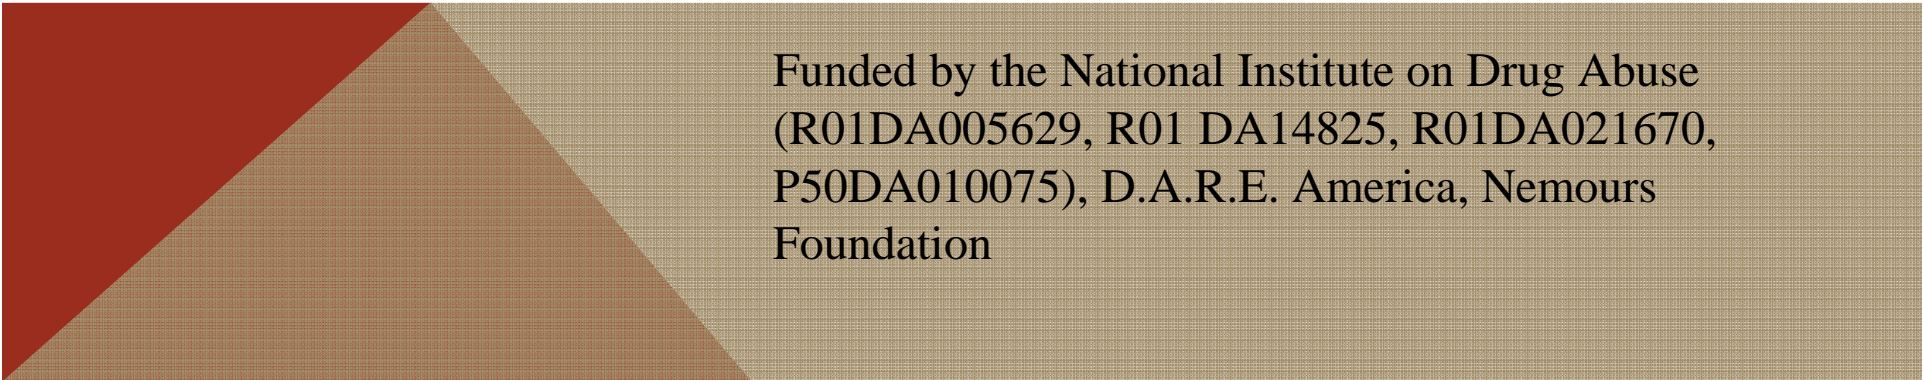

MICHAEL HECHT & THE DRS TEAM
PENN STATE UNIVERSITY

PRESENTATION TO THE SOCIETY FOR
BEHAVIORAL MEDICINE

APRIL 12, 2012

KEEPIN' IT REAL: SCHOOL-BASED, MULTICULTURAL SUBSTANCE USE PREVENTION INTERVENTIONS

- Over 25 years of research about kids experiences with drugs
- Community-based participatory research to develop a school-based substance abuse prevention intervention
- Implement and evaluate a culturally-grounded, narrative substance use prevention programs
 - RCT showed effects on use 14 months after intervention
- Listed as evidence-based program on NREPP
 - Dissemination processes

Funded by the National Institute on Drug Abuse
(R01DA005629, R01 DA14825, R01DA021670,
P50DA010075), D.A.R.E. America, Nemours
Foundation

ADAPTATION PROCESSES

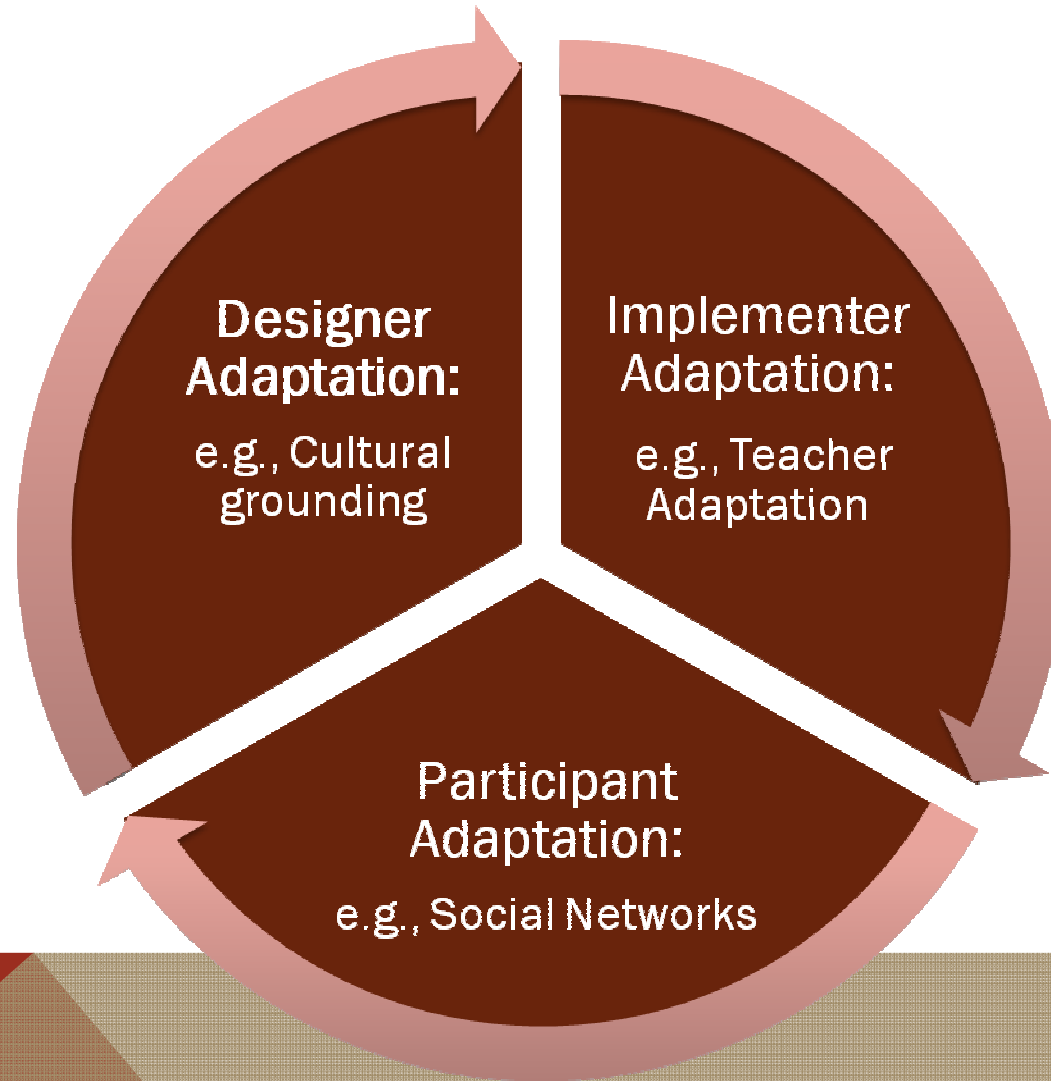

- Adaptation.1: deliberately or accidentally modifying a prevention program by adding or deleting program components, modifying the components, or changing the manner of delivering program components

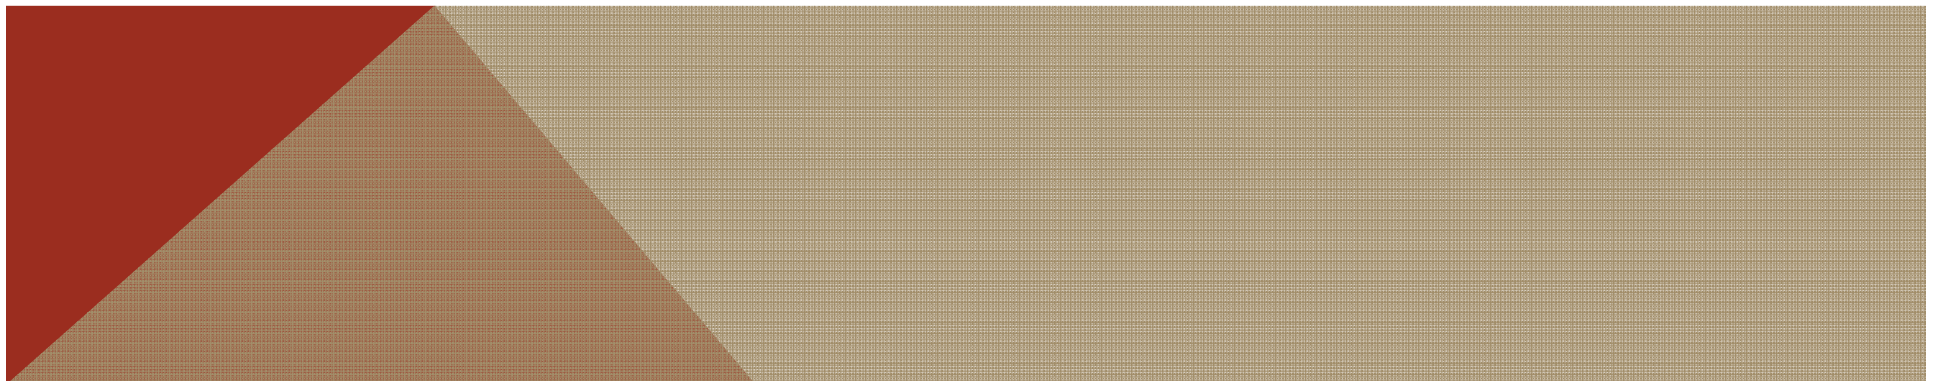

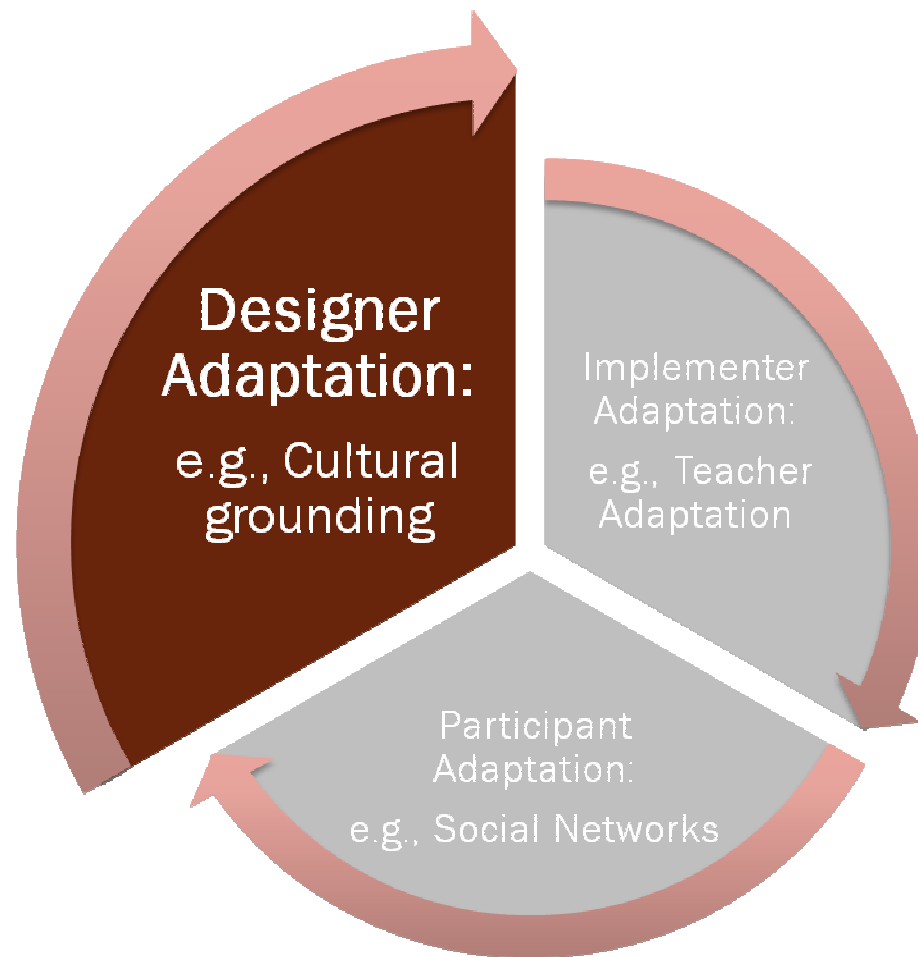

WHAT ACTUALLY HAPPENS?

- Research shows implementers modify interventions
- Aligning prevention theory and research with practice
 - Designers *should* “reinvent” for new populations
 - Implementers *will* “adapt” when communicating health messages
 - Participants are *not passive* recipients
- Adaptation.2 – what happens when implementing prevention messages in new settings

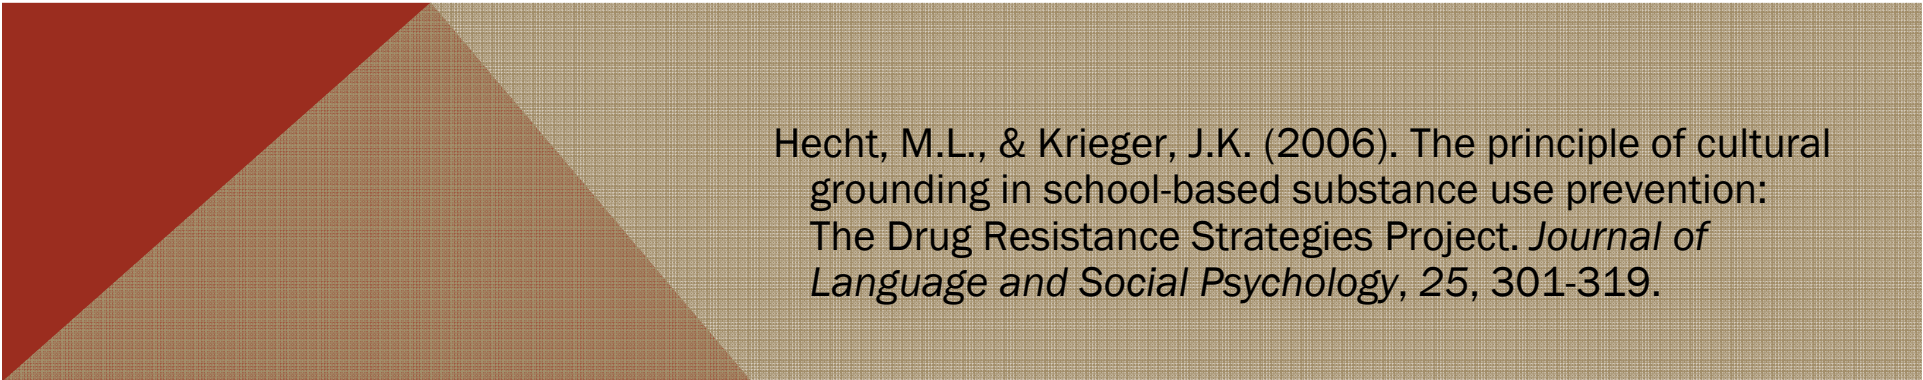

PRINCIPLE OF CULTURAL (RE)GROUNDING FOR HEALTH MESSAGE DESIGN

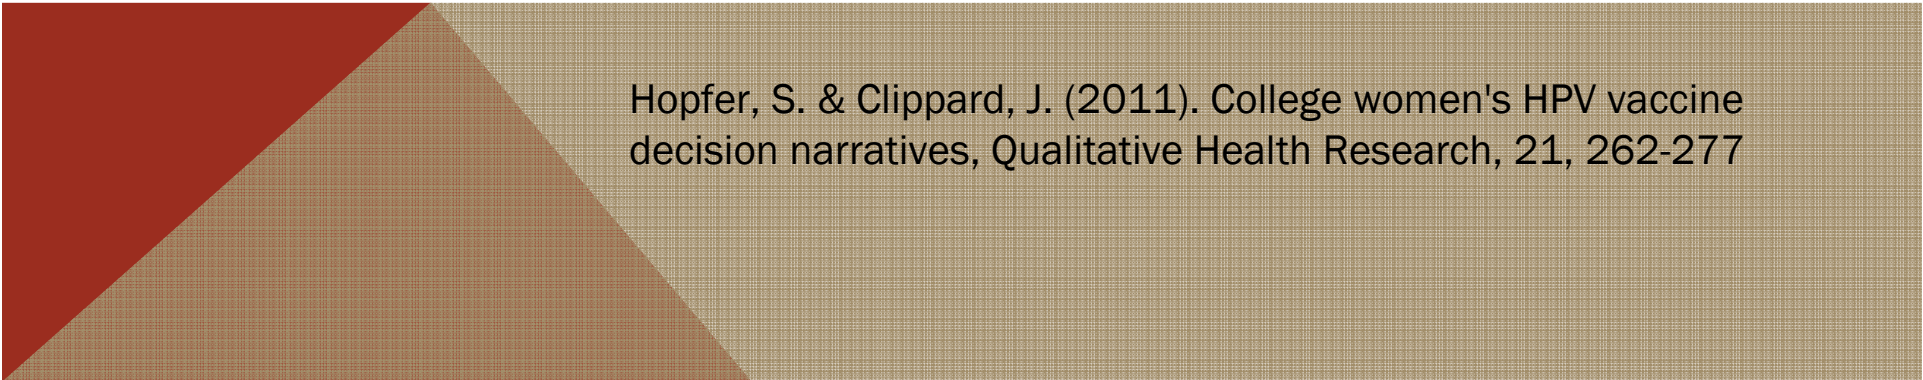

- Start with culture and address its complexity
- Strongest influence when people see their group memberships reflected and acknowledged
- Active participation of cultural group members in message construction
 - Narratives

Hecht, M.L., & Krieger, J.K. (2006). The principle of cultural grounding in school-based substance use prevention: The Drug Resistance Strategies Project. *Journal of Language and Social Psychology*, 25, 301-319.

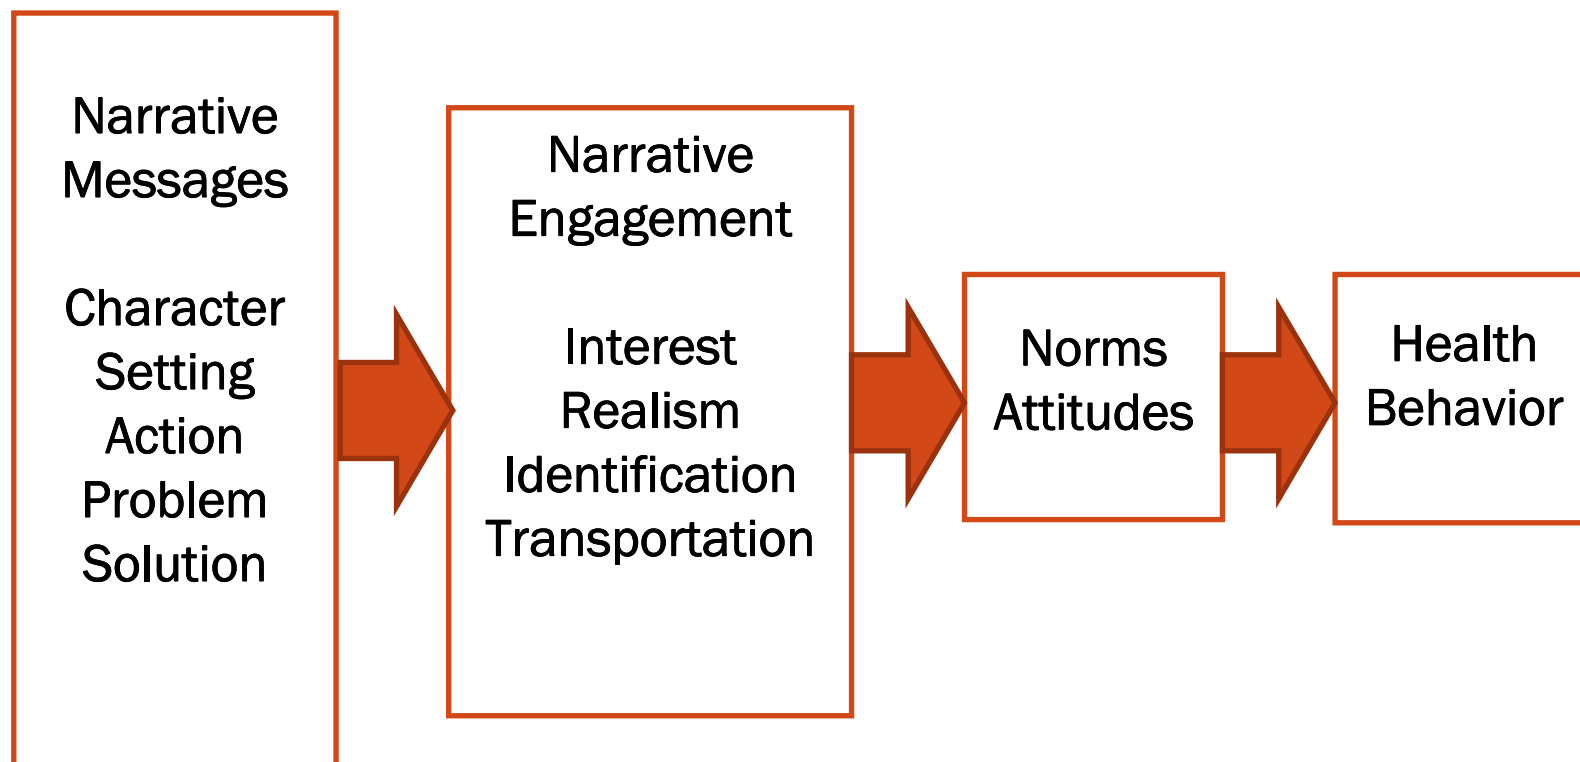

WHY NARRATIVES?

- Overcome resistance
- Engage less involved audiences
- Reach low knowledge audiences
- Render complex information comprehensible
- Culturally ground messages

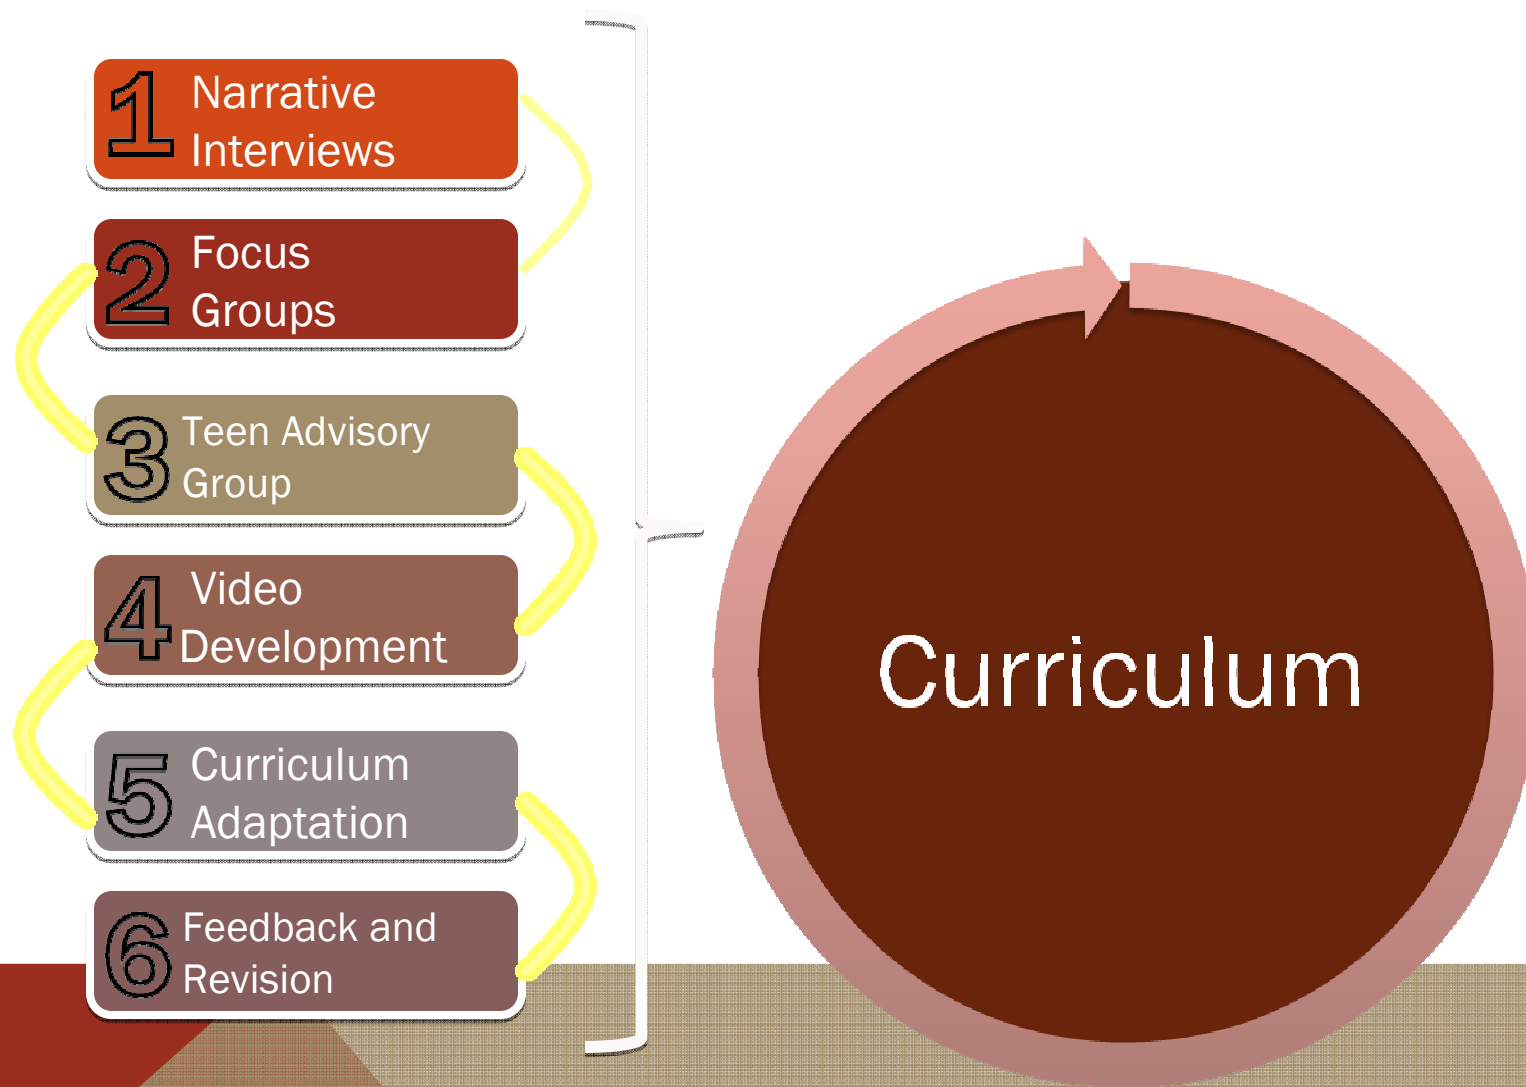

Hopfer, S. & Clippard, J. (2011). College women's HPV vaccine decision narratives, *Qualitative Health Research*, 21, 262-277

NARRATIVE ENGAGEMENT THEORY

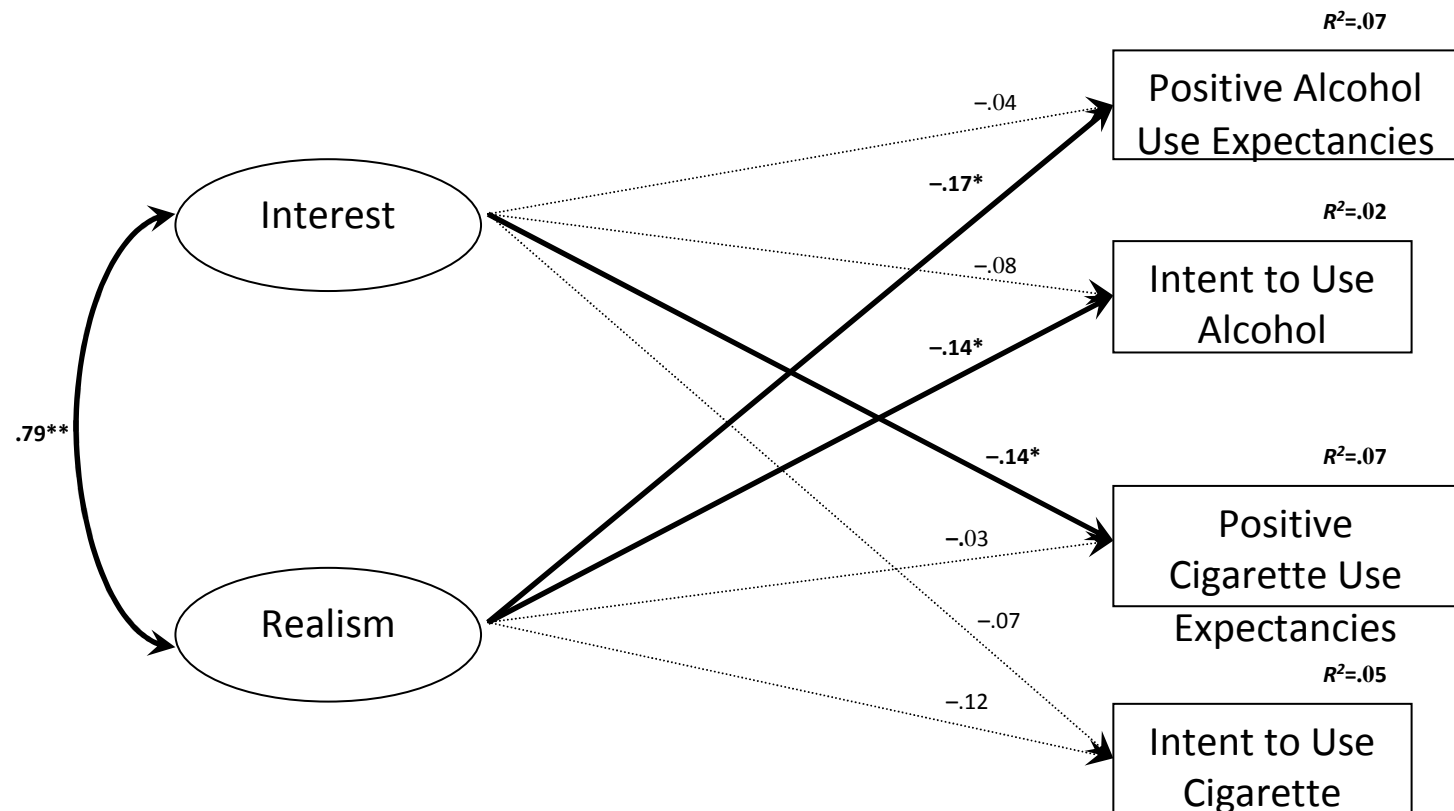

- Miller-Day, M. & Hecht, M.L. (in press). Narrative Means to Preventative Ends: A Narrative Engagement Approach to Adolescent Substance Use Prevention. *Health Communication*.
- Lee, J. K., Hecht, M. L., Miller-Day, M. A., & Elek, E. (2011). Evaluating mediated perception of narrative health messages: The perception of narrative performance scale. *Communication Methods and Measures*, 5, 126-145.

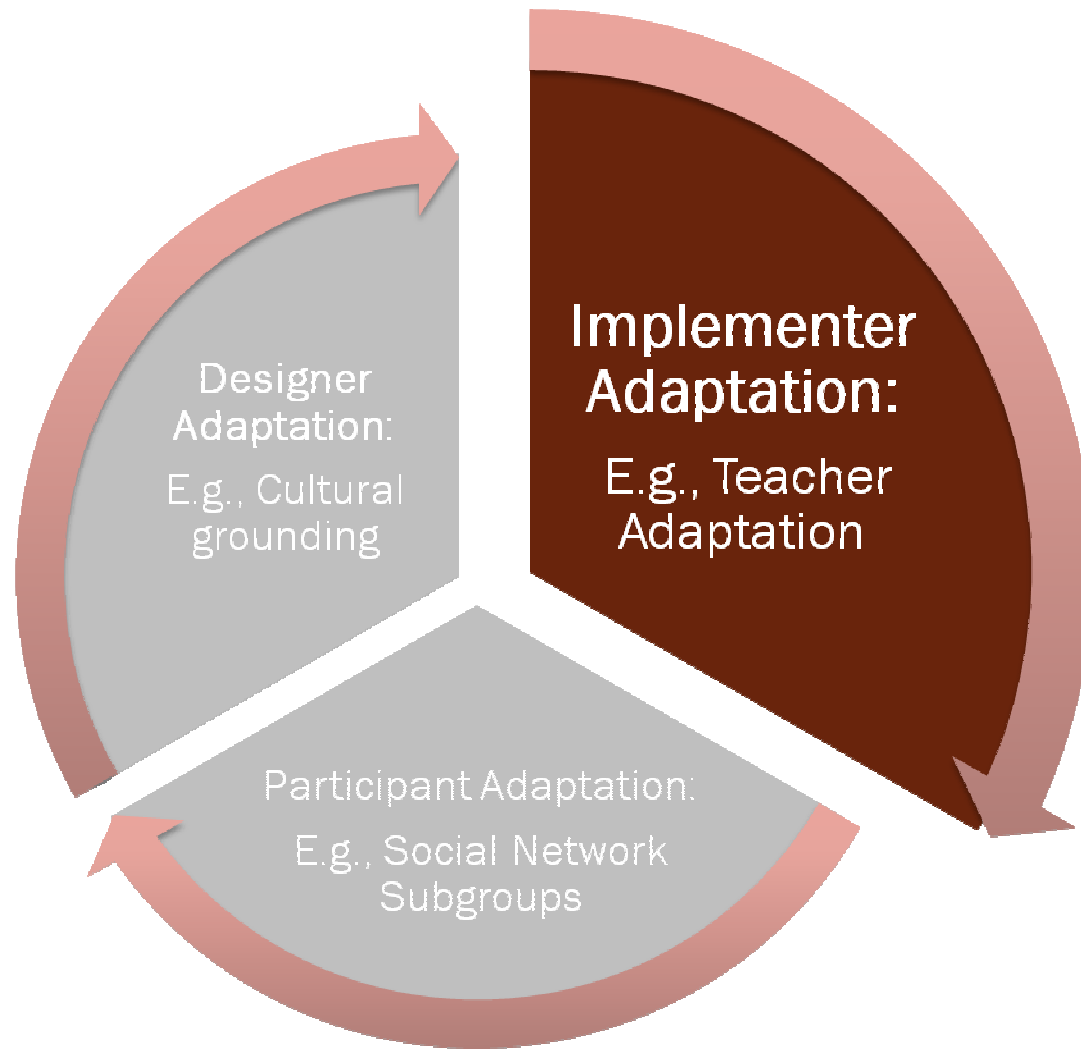

Colby, M., Hecht, M. L., Miller-Day, M., Krieger, J. L., Syvertsen, A. K., Graham, J. W., & Pettigrew, J. (in press). Adapting school-based substance use prevention curriculum through cultural grounding: A review and exemplar of adaptation processes for rural schools. *American Journal of Community Psychology*.

EFFECTS OF NARRATIVE ENGAGEMENT

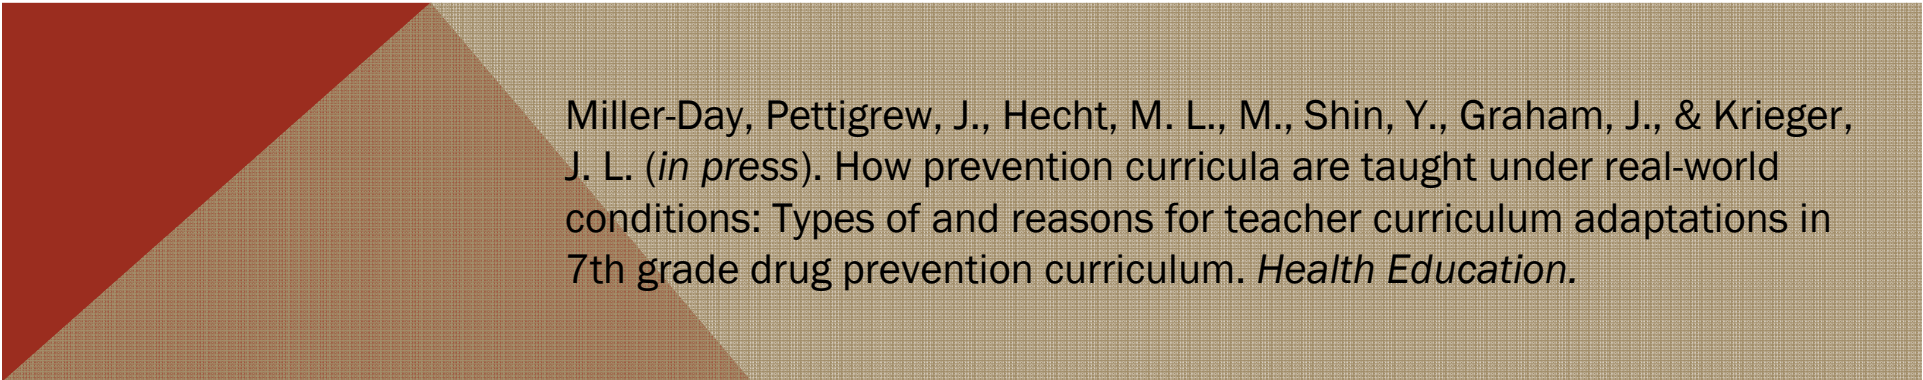

Chi-Square = 66.24 ($df = 23$), CFI = .98, SRMR = .035, RMSEA = .042

Lee, J. K., Hecht, M. L., Miller-Day, M. A., & Elek, E. (2011). Evaluating mediated perception of narrative health messages: The perception of narrative performance scale. *Communication Methods and Measures*, 5, 126-145.

IMPLEMENTER ADAPTATION

- To their own teaching style
- Why?
 - Based on practical considerations (time, competing events)
 - To more effectively reach students
- Research note – observers note more changes than teachers report.

Miller-Day, Pettigrew, J., Hecht, M. L., M., Shin, Y., Graham, J., & Krieger, J. L. (*in press*). How prevention curricula are taught under real-world conditions: Types of and reasons for teacher curriculum adaptations in 7th grade drug prevention curriculum. *Health Education*.

PROFILES OF DELIVERY PRACTICES: LPA

5 Class model Statistics:

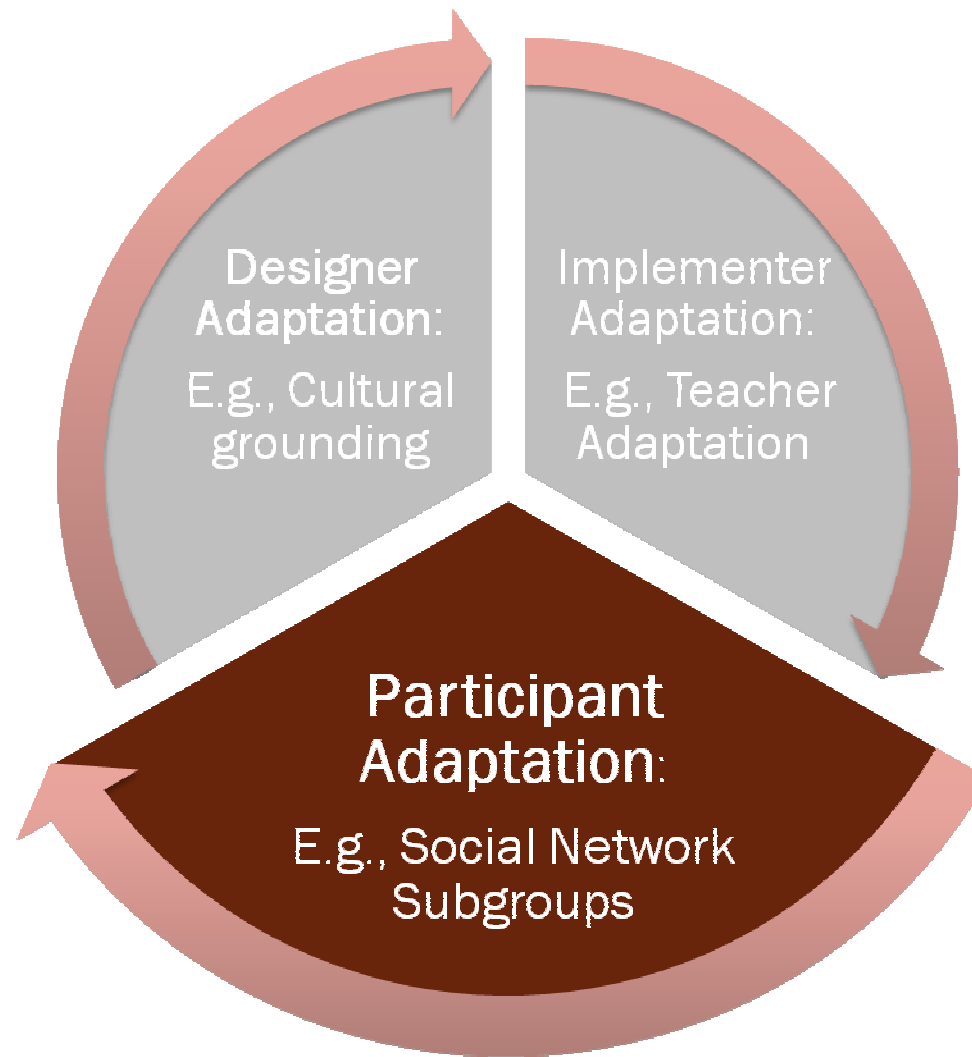

Log likelihood = -2054.453

AIC = 4200.907

BIC = 4367.445

Entropy = 0.973

Shin, Y., Miller-Day, M., Pettigrew, J., Hecht, M.
L., Kreiger, J., & Graham, J. W. , 2011

PARTICIPANT ADAPTATION

Interpretive Processes

- Narrative framing
- Social cognition

Social Network Processes

- Talk with peers & parents
- Which networks and networks positions does the intervention reach?

WHO IN THE NETWORK IS MOST LIKELY TO USE DRUGS?

Liaisons, members, or isolates?

- Liaisons (Choi & Smith, under review)

DO THEY TALK ABOUT THE INTERVENTION?

NEGATIVE CONVERSATION NETWORK

POSITIVE CONVERSATION NETWORK

Red = Female
Blue = Male
Orange ties = Reciprocal
relationship

Thank you!
